Washington, DC 20591

JUN 05 2014

Dear Industry Representative:

We are requesting your review of Advisory Circular (AC) 150/5320-17A, Airfield Pavement Surface Evaluation and Rating Manuals. This AC provides limited guidance on understanding and rating the surface condition of flexible (asphalt) and rigid (concrete) airfield pavements. Asphalt and Concrete Airfield Pavement Surface Evaluation and Rating Manuals (PASER Manuals) are in Appendix 1 and Appendix 2 of this AC. These manuals describe a simple system to visually rate pavement condition on a scale ranging from excellent to failed.

This AC is a reissuance of the Asphalt and Concrete Airfield Pavement Surface Evaluation and Rating Manuals (PASER Manuals). The manuals are unaltered.

We request concurrence with the enclosure. We will consider comments received by June 23, 2014, for inclusion in the final advisory circular.

Submit comments on the provided COMMENTS MATRIX, which references the paragraph and line number in question with your recommended change. Please EMAIL (Do not mail) the completed MATRIX to Gregory Cline at Gregory.Cline@faa.gov.

This Draft AC along with the PASER manuals are available and can be viewed at the FAA Airports website: http://www.faa.gov/airports/resources/draft_advisory_circulars/

Sincerely,

John R. Dermody, P.E.
Manager, Airport Engineering Division
